

Reduction in EE consumption (kWh) for the same number of SQM produced.

ORGANIZATION

An organizational structure with an Energy Manager who oversees all aspects related to energy optimization through specific projects aimed at enhancing the company's productivity performances connected with consumption.

L gasolio / 1000 SQM

ACTIONS

- a. "Plug in hybrid" electric company cars: 7 operational as of 2021.
- b. Electric forklifts: A renewed complete fleet of 50 electrically powered forklifts, currently operating in the company.
- c. Future target of vehicles for road transport powered by biogas to the logistics centres to be implemented by 2028.

EE Green

REDUCTION OF CONSUMPTIONS AND IMPACTS

Search for green alternatives to in-house refrigerant gases, with the aim to replace those with higher GWP in 2028. Target of 100% use of green electricity by 2023.
